Addition to the Trinity United Methodist Church Addition
Ronceverte, West Virginia

- Design / Build Team: Spectrum Contracting Services and Million Architecture
- Owner: Trinity United Methodist

Challenged to develop a design solution that fell within budget, meet the program, and create an addition that would not detract from the church's original historic design, Million Architecture and Spectrum Contracting Services developed an effective and efficient solution for the Trinity United Methodist Church in Ronceverte, West Virginia. As with many older structures, handicapped accessibility was not a consideration in the original design. But with an aging church population, and needs beyond their current facilities, the leadership decided that an investment in the facilities was needed to secure the future growth, and mission of the church body. This project was completed in the spring of 2007 and is enjoyed by this newly expanded and growing church body.
